

Chip Coils Monolithic and Film Type SMD (Cont.)

Dimensions in mm

Table with columns: Inductance (nH), Tolerance, Test Freq. (MHz), Rated Current (mA), Q (Min.), DCR (Ω), SRF Min. (MHz), Digi-Key Part No., Cut Tape Pricing (1, 10, 100), Tape and Reel Qty., Pricing, Murata Part No.

LQM18F Series

Special ferrite material, whose inductance change caused by bias current is small, enables large rated current of 50mA at 10 micro H. Magnetically shielded structure enables good crosstalk characteristics.

LQM18N Series

Magnetically shielded chip coils were developed by using original multilayer process technology and magnetic materials. Compact size is suitable for high density mounting. Shielded construction is not affected by interference from peripheral components.

LQM18H Series

Designed to realize stable characteristics in high frequency range applying integrated multilayer process. Monolithic air core.

LQM21D Series

Table with columns: Part No., t. Rows include LQM21DN4R7N00D, LQM21DN100N00D, LQM21DN220N00L.

Consists of magnetically shielded chip inductors. It has less than half the DC resistance of our conventional monolithic chip inductors as well as high inductance. Monolithic design.

LQM21F Series

Suitable for power line choke because of its excellent direct current characteristics. The series has larger rated current (60mA at 10 micro H) than conventional rated current. Monolithic ferrite core.

LQM21N Series

Consists of magnetically shielded chip inductors developed using Murata's original multilayer process technology and magnetic materials. The miniature size of 2.0mm x 1.25mm enables compact design of electric equipment.

LQM21P Series

Features: • Small size in 2.0x1.25mm • Low profile • Large rated current of 1100mA • Magnetically shielded structure • Outstanding solder heat resistance, either flow or reflow soldering methods can be employed Applications: • DC-DC converter circuits for mobile equipment

LQM2H Series

Features: • Small size of 2.5mm x 2.0mm • Flow/Reflow solderable • Low profile: 1.0mm max. • Large rated current: 1600mA, 1.0uH • Low DC resistance • Magnetically shielded structure Applications: • DC-DC converters of mobile devices

LQM31P Series

Features low DC resistance and magnetically shielded structure. Outstanding solder heat resistance. Either flow or reflow soldering methods can be employed.

E

0 For Tape and Reel part number, change 1-ND to 2-ND.

Digi-Reel Most SMT cutdown parts are available on a Digi-Reel. For Digi-Reel part number, change 1-ND to 6-ND or CT-ND to DKR-ND. See Digi-Key Services on page 2 for additional information.

Free shipping on orders over £50! All prices are in British pound sterling and include duties.
