◆ **RoHS Compliant** ◊ The LED chips are distributed over the whole lit area, bonded in a pattern which gives the most uniform illumination. Power connection is made by two solder holes, marked "A" for +5V and "K" for Ground. ‡ Bezels can be found under PRD Plastics in the manufacturer index. † Pin Version

Serial/I²C LCD, VFD and PLED Displays

Specifications:
 Standard Voltage: 4.75V ~ 5.25V **LCD Type:** • Covers most of the popular LCD configurations. Control of these modules has been simplified to a set of commands delivered to the modules via RS232 and I²C communications protocols. **VFD Type:** • Brightest of all displays • Performance is not affected by temperature. **PLED Type:** • Self-luminous displays that do not require backlighting • Use much less power than a traditional LCD or VFD • 160-degree viewing angle

Additional options for increased voltage and higher operating temperatures are available. For pricing, options and availability, visit our website.

Serial/I²C Graphic Displays

Control of these modules has been simplified to a set of commands delivered to the modules via RS232 and I²C communications protocols.
Specifications: Standard Voltage: 4.75V ~ 5.25V
Features: • Download fonts of any size, style or language
 • Create graphics using bitmaps, pixels, lines, rectangles and bar graphs

Additional options for increased voltage and higher operating temperatures are available. For pricing, options and availability, visit our website.
